

# E.ON Solar

*e-on*

You're in safe hands. With over 1,000 solar customers across Europe already, we'll use our expertise to find the right solution for you and your home. And be there every step of the way.

-  Expert Partners. Our energy experts select the latest and most reliable available solutions in the market.
-  Take control. See what you're generating, saving, earning and storing on your E.ON Solar manager app.
-  Peace of mind with warranties of up to 25 years, to help protect your investment.

## 5 simple steps to solar and storage

Visit [eonsolar.co.uk](http://eonsolar.co.uk)  
Start storing. Start saving.  
E.ON Solar and storage

\* These are example figures. All savings are based on a south facing property in central England with a 40 degree roof tilt and no shading, with an electricity consumption of 4,900 kWh. Saving assumes fitting 12 x 320W panels and a 9.6 kWh battery plus a deemed export of 50%. FIT rate based on figures published 1 February 2017 for a March 2017 install.

Solar power for your home,  
day or night.

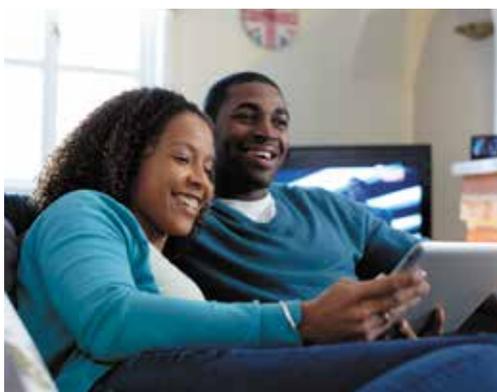

## Solar energy you can use day or night

Introducing innovative solar photovoltaic and battery technology that allows you to store spare energy you generate from the sun.

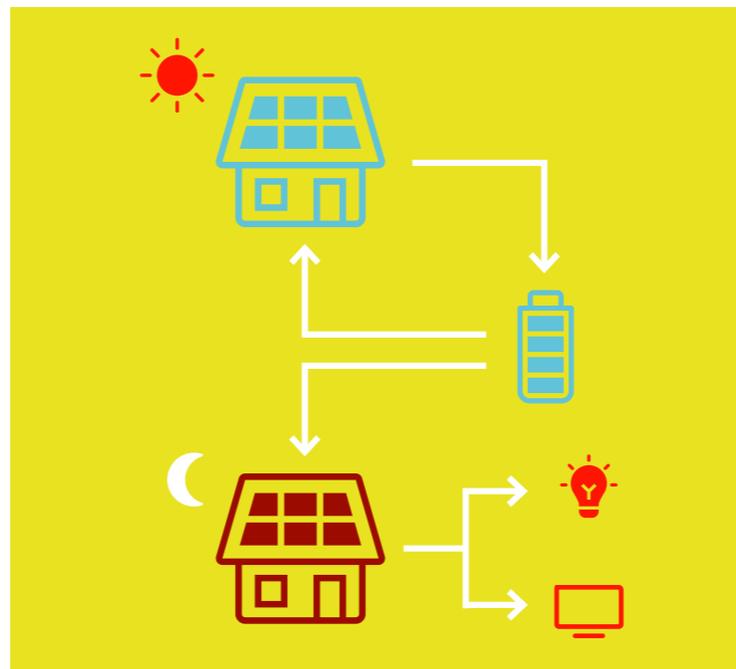

With E.ON Solar and storage you can create and store your own cleaner energy. Save money on your energy bills year on year and be more independent from the grid. Plus earn money too with the Feed-in tariff.

### You're in control

As well as generating and storing your own energy, you're in control of it too. Our E.ON Solar manager app shows you what you're generating, storing, earning and saving.

## How does it work

### Solar PV Panels

With E.ON Solar you can pick from a range of solar pv panels. We'll help you choose the best solution for you and your home. You'll be part of the design process putting you in control of the price, performance and what they look like.

### Battery Storage

Adding a battery to your E.ON solar system means you'll use more of the energy you generate. E.ON solar and battery storage could give you an extra £560\* a year, with your savings and earnings. We'll help you pick the best battery for your home.

### E.ON Solar Manager

Make the most of your new solar system with E.ON solar manager. The handy app will give you 24 hour access to your system's performance. You'll see what you're generating, storing, earning and saving now, today and over time.

### Peace of mind

To help protect your investment, we give you warranties on all products, some up to 25 years. Some of our systems also come with a performance guarantee, which means if the generation drops below the figure quoted for the system we've designed for you, we'll pay you the difference.

## E.ON solar products

We've used our solar knowhow to select a range of high performing solar and storage options.

- Mix and match your system with our expert to find the right E.ON Solar solution for you.
- Add a battery to your new or existing system and keep more of the solar energy you generate to use when you need it.
- There's a range of batteries and storage sizes to choose from. And if your needs change, you can add to your battery with our modular system.

## How battery storage works

Battery storage lets you keep more of the energy you generate to use in your home. If you're out of your home during the day, when you're generating the most, this would

go back into the grid. E.ON Solar storage allows you to charge your battery with energy you're not using in your home, to use when you need it.
